

GRANDHI CHANDRA SAI LAASYA

📞 +91 8985200516 ✉ laasya865@gmail.com [🌐 LinkedIn](#) [🐙 Github](#)

Education

Vellore Institute of Technology, Andhra Pradesh

B.Tech in Computer Science & Engineering

2023 – 2027

CGPA: 8.54/10

Resonance Junior College, Hyderabad

Intermediate (Class XII)

2021 – 2023

Percentage: 84.1%

Bharatiya Vidya Bhavan's Public School

Schooling (Class I – X)

2009 – 2021

Percentage: 85.2%

Experience

MERN Full Stack

Feb 2025 – May 2025

Frontend Development

Remote

- Built full-stack web applications during training projects.
- Developed responsive user interfaces and integrated backend services with databases.
- Worked on API development, database management, and application deployment.
- Gained hands-on experience with the complete software development lifecycle (SDLC).

Machine Learning Intern

May 2025 – June 2025

Skillfied Mentor

Remote

- Gained hands-on experience in supervised and unsupervised learning techniques.
- Built and evaluated ML models for real-world datasets.
- Python libraries used: NumPy, Pandas, Matplotlib, Scikit-learn.
- Worked on data preprocessing, model building, and performance evaluation.
- Strengthened foundation in AI/ML and applied problem-solving skills.

Projects

Portfolio Website

- Developed a personal portfolio website to showcase skills, projects, and achievements.
- Built using HTML, CSS, JavaScript, and hosted on a cloud platform.
- Focused on responsive design and clean UI for better user experience.

Breast Cancer Prediction

- Implemented a classification model to predict breast cancer using medical datasets.
- Used Python libraries: NumPy, Pandas, Matplotlib, Scikit-learn.
- Worked on data preprocessing, feature selection, model training, and evaluation.

Glucose Level Detection

- Developed a regression model to predict glucose levels from health data.
- Applied data cleaning, preprocessing, and model building with **Python ML libraries**.
- Evaluated performance using standard metrics to ensure accuracy and reliability.

Movie Recommender System

- Developed a movie recommendation web application to suggest similar movies based on user preferences.
- Built using Python, Streamlit, Pandas, and integrated with the TMDB API for movie posters.
- Implemented content-based filtering and designed a responsive Netflix-inspired interface.

Technical Skills

Languages: Python, Java

Backend: Spring Boot

Frontend: HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Developer Tools: VS Code, GitHub

Major Certifications

Black Bucks MERN Full Stack

- Learned how to build scalable systems, handle deployments, and gained industry-level work experience.

Skillfied Mentor Internship

- Completed training in Machine Learning, covering supervised and unsupervised learning, model building, and evaluation using Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn.
